PREFATORY NOTE

In April of 1962, the NAUTILUS completed its seventy-fifth volume and a milestone had been reached in the history of this, the oldest surviving North American malacological journal. To mark the occasion and to honor those who have kept the NAUTILUS alive these many years, this author index, which records the contributions that have appeared in the NAUTILUS and its predecessor the CONCHOLOGIST'S EXCHANGE, is issued.

Two indexes to the NAUTILUS have been previously published, one in 1927 (volumes 1 - 34) and another in 1951 (volumes 35 - 60). Both are now out of print and it is not likely that they will be reprinted individually. It should be noted that the two previous indexes contain both author and systematic indexes. Should the present index be well received, it may be possible to prepare a companion volume with a systematic index to all seventy-five volumes of the NAUTILUS.

This index differs in some particulars from its predecessors. Many titles omitted from the first index have been included here and a few minor corrections have been made; pages are given in full and references to plates and figures have been added. The list of obituaries at the end of the alphabetical list of titles is complete for all seventy-five volumes.

In this author index, reviews are clearly noted by being preceded by the words "REVIEW OF." Spaced letters are used instead of underlining to indicate italics. The double dash (--) indicates the end of the title quoted and precedes the volume, number, and page of the NAUTILUS on which each article starts.

The compiler will be glad to hear of errors of omission or commission that may be detected in this index and promises to issue a list of errata if that should be necessary.

OBITUARIES IN THE NAUTILUS, VOLUMES 1-75

NOTE. Thanks to a great deal of searching on the part of Miss Geneva Smithe, then of the University of Michigan, complete names and dates of birth and death were obtained for most of the subjects of obituaries in the Second Index to the Nautilus. In this index, the search for biographic information has been unsuccessful in many cases. The compiler would be grateful to the readers of this Author Index for details, such as full names and dates, which would complete the information given below.
